

# BSc (Hons) Accounting & Finance with Foundation Year Programme Handbook

Published March 2021

# Introduction to the Programme

Welcome to the BSc (Hons) Accounting and Finance with Foundation Year programme handbook. This handbook provides you with information about the structure of your programme and a description of each of the modules that you will study.

The programme is made up of the modules listed below. An outline of the content of each of the modules and the assessment methods used can be found in the Module Detail section on iLearn.

Module			Module Type
Code	Module Title	Credits	(Core/Option)
	Academic Skills Practice	20	Core
	Introduction to Numeracy, Data & IT	20	Core
	Introducing Research Skills	20	Core

#### Please note that modules may not be delivered in this order; please refer to your course timetable.

#### What is ACCA?

The Association of Chartered Certified Accountants (ACCA) is a professional accountancy body which works all over the world to build the profession and make society fairer and more transparent. The degree maps over to ACCA papers F1-F9, the maximum available. This means that students can go on to complete the ACCA professional qualifications after studying Arden University's accredited BSc course rather than starting from the beginning. Arden University's programme gives the student both a professional and academic qualification. Memberships gives students access to a wide range of resources that may help them during their studies.

#### **ACCA Exemptions**

Students who successfully complete the BSc (Hons) Accounting and Finance with Foundation Year will be exempt from papers F1 to F9 of the ACCA (the Association of Chartered Certified Accountants) Qualification; this is the maximum number of exemptions that can be awarded! These are detailed in the table below.

BSc (Hons) Accounting and Finance Modules	ACCA Qualification Exam Paper Exemptions
On completion of course	Papers F1 – F4
Management Accounting (FIN5004)	Paper F5
British Taxation (FIN5006)	Paper F6
Financial Reporting (FIN5009)	Paper F7
Audit (FIN6002)	Paper F8
Financial Management (FIN6003)	Paper F9

### **Arden University Assessment Regulations**

Students will be assessed in accordance with the standard Arden University assessment regulations which can be found on the Arden University website <u>http://arden.ac.uk/</u>

#### BSc (Hons) Accounting & Finance with Foundation Year

#### 10. Programme Aims

The overall aim of the AU BSc (Hons) Accounting & Finance with Foundation Year is to enable students to acquire knowledge, understanding and a range of practical skills relating to key and inter-connected accounting disciplines applicable to a range of commercial and non-commercial sectors, local, national and global, and in a variety of geographical and cultural settings. Simultaneously students will develop a range of transferrable skills that will assist them in as they pursue their careers or further relevant study.

More specifically at Level 3 it will:

- enable learners to confidently identify and use relevant understanding, methods and skills to complete tasks and address problems.
- equip learners with basic numeracy, academic and research skills in preparation for future undergraduate study.
- enable learners to take responsibility for initiating and completing tasks and procedures as well as exercising autonomy and judgement within limited parameters.
- reflect awareness of different perspectives or approaches when collaborating with others within an area of study or work.
- enable learners to develop a basic understanding across a range of management and technology disciplines.

At Levels 4-6 it will:

- enable students to develop professional level skills and understanding across a range of accounting related disciplines.
- emphasise understanding of the external environment within which an organisation operates.
- promote understanding of the key aspects of current practice and the interconnectedness of key areas within the field of accountancy.
- equip students with the essential employability skills and tools to work ethically and professionally in a business environment and to be effective practitioners, when working independently and when collaborating with others.

- enable students to communicate effectively through a variety of media and presentational forms used in business.
- equip students to work within multicultural settings and to appreciate the complexity of decision making in such contexts.
- develop decision making skills which best support the growth of enterprise.
- provide an intellectually stimulating online academic environment in which students can develop confidence as independent learners and as members of an international community of learners and thereby inspire students to become lifelong learners.

The programme is designed to provide opportunities for students to develop their knowledge and skills in business in a flexible way. Learning materials have been developed which allow students to maximise the time they have available for study and the programme structure allows students to determine the pace at which they learn. The programme also provides a range of supports for distance learning students thereby allowing international access.

11. Intended programme learning outcomes	and the means by which they are achieved and demonstrated	
11a. Knowledge and understanding	The means by which these outcomes are achieved	The means by which these outcomes are demonstrated
At Level 3: With due regard to the QAA Recognition Scheme for Access to HE: The Access to Higher Education Diploma specification 2018, the intended programme learning outcomes are for students at Level are to: A1/0 Use factual, procedural and theoretical understanding to complete tasks	<ul> <li>Acquisition of knowledge and understanding is facilitated through either:</li> <li>a combination of online learning blended with face to face learning which will include, workshops and tutorials; group discussions and independent and directed study, supported throughout by comprehensive online teaching materials and broader resources; or</li> <li>online learning which will include facilitated group discussion, independent and directed study, supported throughout by comprehensive online teaching materials and broader resources; or</li> </ul>	Assessment methods and strategies: In general, our assessment strategy encourages a variety of assessment methods (where appropriate) all explicitly aligned to learning outcomes that focus upon knowledge, understanding and skills. It should be note that in terms of this accountancy programme there is an emphasis on
<ul> <li>At Levels 4-6:</li> <li>A1: Critically evaluate accounting concepts and principles and their application in solutions to practical accounting problems.</li> <li>A2: Prepare financial statements of</li> </ul>	<ul> <li>Comprehensive online teaching materials and broader online resources</li> <li>We achieve this through a pedagogy that includes project work, group forums and project-based activities.</li> <li>That is:</li> <li>Asynchronous</li> </ul>	examination as this matches the requirements of the ACCA.
<ul> <li>entities, including groups of</li> <li>companies, using relevant financial</li> <li>information, accounting techniques</li> <li>and standards; and to analyse and</li> <li>interpret such financial statements.</li> <li>A3: Use relevant management accounting</li> </ul>	<ul> <li>Independent and directed student study, supported throughout by comprehensive online multi-media teaching materials and resources accessed through our VLE</li> <li>Guided group / project based work</li> <li>Discussion forums where students discuss and critically engage</li> </ul>	
techniques with cost information, for planning, decision-making, performance evaluation and control, within different business settings.	<ul> <li>with themes emerging from the materials they engage with, following the posing of questions or propositions, case studies or similar by either tutor or students themselves</li> <li>Podcasts and narrated PowerPoints</li> </ul>	
A4: Apply financial management techniques to issues affecting investment, financing, and dividend policy decisions of an organisation.	<ul> <li>Synchronous</li> <li>Face to face seminars where theory and practice are integrated.</li> </ul>	

A5:	Understand the general legal
	framework, and apply specific legal
	principles relating to business,
	including taxation legislation as
	applicable to individuals, single
	companies and groups of companies.

- A6: Explain the process of carrying out the assurance (audit) engagement and its application in the context of the professional (audit) regulatory framework.
- A7: Describe the organisational context of the accountant and of the development of accounting information systems; to understand the need for the efficient use of resources within an organisation.
- A8: Prepare non-complex financial statements using generally accepted accounting principles.
- A9: Evaluate and comment on the performance and financial situation of organisations using a range of interpretative techniques.
- A10: Select and apply appropriate accounting and financial management techniques to organisational business planning, decision-making and control.
- A11: Understand the limitations of accounting techniques and the implications of such limitations.A12: Communicate analysis of accounting and financial information and

- Independent and directed student study, supported throughout by comprehensive teaching materials and resources.
- Guided group / project-based work

Throughout, the learner is encouraged to undertake independent study to both supplement and consolidate what is being learnt and to broaden their individual knowledge and understanding of the subject. Learning is facilitated largely by set tasks with regular tutor support including small group forums. This allows students to not only discuss with staff their own work and progress, but to also see other students' work and to engage in the discussions that relate to the work of their peers.

There is a requirement for written work at all levels including reports, essays, practical tasks, developed plans, time constrained set work, etc. Our assessment strategy informs how feedback is supplied by tutors at the formative and summative assessment phases. Developing critical analysis through a structured taxonomy is encouraged as students' progress through levels 4 - 5 levels culminating in a dissertation.

All students complete an induction module prior to starting on subject discipline units of work. The induction module requires students to undertake a range of tasks that both test and develop subject specific and online pedagogical knowledge, understanding, and skills.

recommendations to a variety of different audiences. A13: Communicate appropriately in writing and through an oral presentation. A14: Demonstrate comprehension of basic mathematical functions. A15: Demonstrate an appreciation of ethical issues associated with professional practice.		
11b. Intellectual (thinking) skills	The means by which these outcomes are achieved	The means by which these outcomes are demonstrated
At Level 3 B1/0 Apply knowledge and understanding to basic, non-complex situations to solve problems.	Intellectual skills (B1 – B5) are developed throughout the programme by the methods and strategies outlined in section A, above. Intellectual development is further encouraged via formative assessment tasks including set briefs, in-module activities, self-initiated briefs, and discussion with tutors and	Assessment methods and strategies: Our assessment strategy encourages a variety of assessment methods all explicitly aligned to learning outcomes
At Levels 4-6: B1: Solve problems through the identification of key issues, synthesis of information and analytical tools, and the presentation and critical evaluation of a range of options.	peers (in online forums/debates). Specific modules support the development of quantitative and qualitative analysis, and the development of self-reflective skills. In addition, the student's thinking skills will be evident in a summative assessment process which requires and rewards	that focus upon knowledge, understanding and skills, however within this particular programme there is an emphasis on formal examinations as this matches the specific requirements of the ACCA.
<ul><li>B2: Undertake an independent Research Report relating to a single organisation or industry sector.</li><li>B3: Prepare a written report which meets</li></ul>	learners for the demonstration of creative thinking and problem solving, analysis, judgement and self-reflection in the development of solutions.	
academic requirements of information collection and referencing of information sources.	Throughout, the learner is encouraged to develop intellectual skills by undertaking further independent study and research in order to further consider a range of perspectives.	
B4: Complete a programme of study through independent and self- managed learning.		

B6:	Understand the limitations of acquired knowledge of legal and taxation issues and recognise the need to seek further specialist advice where necessary. Reflect on the learning attained through completing the programme and its impact on future professional development and employment roles.		
11c.	Practical skills	The means by which these outcomes are achieved	The means by which these outcomes are demonstrated
acad undo C2/0 of in and At L	el 3 D Demonstrate a range of core demic skills to support study at ergraduate level. #### 12. Graduate Attributes and the means by which they are achieved and demonstrated

#### Graduate Attributes

The concept of the Arden University Graduate, based upon the definition of 'graduate attribute' by Bowden et al (2000) has been developed around 6 attributes

E01 – Discipline Expertise

- E02 Effective Communication
- E03 Responsible Global Citizenship
- E04 Professional Skills

E05 – Reflective Practitioner

E06 – Lifelong Learning

All six attributes are relevant to this programme and form a specific learning outcome in each module. The means by which these outcomes are achieved and demonstrated

The achievement of these attributes is integrated into all programmes of study curriculum, unit study tasks (individual and group work) and through summative assessment tasks. A contextualised version of the AU Graduate Attributes forms the last Learning Outcome on each Module Descriptor Form. Note – the graduate attribute itself is embedded across the module and therefore within the assessment strategy (formative & summative).

#### 13. Learning and teaching methods and strategies

Learning and teaching methods and strategies are delivered through a blended and integrated learning and teaching pedagogy that includes both asynchronous and synchronous activity.

#### For Online Learners:

Asynchronous

- Independent and directed student study, supported throughout by comprehensive online multi-media teaching materials and resources accesses through our Virtual Learning Environment
- Guided group / project-based work
- Research tasks
- Discussion forums where students discuss and critically engage with themes emerging from the online materials they engage with, following the posing of questions or propositions, case studies or similar by either tutor or students themselves.
- Podcasts and narrated PowerPoints

#### For Blended Learners:

Synchronous

- Face to face activity workshops and seminars where theory and practice are integrated.
- Independent and directed student study, supported throughout by comprehensive teaching materials and resources.
- Guided group / project-based work

Based upon the profile of our typical student profile, our strategy enables students to engage with a variety of learning tools that best meet their learning styles, overall objectives and personal circumstances. Developing independent study skills is the cornerstone of the learner experience, supported by peer engagement and engagement with the tutor and academic skills team. There is a requirement for written work at all levels including reports, essays, practical tasks, developed plans, timed examinations, portfolios of work etc., and our assessment policy informs how feedback is supplied by tutors at the formative and summative assessment stage.

#### 14. Assessment methods and strategies

Our assessment strategy encourages a variety of assessment methods all explicitly aligned to learning outcomes that focus upon knowledge, understanding and skills. These are contextualised so that the

assessment is directly relevant to each subject area and assessment methods include case study analysis, written essay, critical self-reflection, portfolios of evidence, sector report production, time constrained tests, etc.

#### 15. Employability

Our approach pays due regard to the UKCES report 'The Employability Challenge' (2009a) definition of employability, 'the skills almost everyone needs to do almost any job. They are the skills that must be present to enable an individual to use the more specific knowledge and technical skills that their particular workplaces will require.' Employability is an important strand integrated into the curriculum, learning tasks and summative assessment.

The development of key skills for future employability is reflected and embedded through the AU values (Programme Outcomes C & D) and the AU Graduate Attributes. This development is supported throughout the student journey with the suite of tools provided by the Ab Integro Careers Portal on the student home page.

#### **16. Entry Requirements**

- IELTS 6.0 (no less than 5.5 in any element) or equivalent for students whose medium of prior learning was not English.
- GCSE Maths Grade C or equivalent
- Candidates who demonstrate an ability to study the programme as evidenced through previous a personal statement (of between 350-500 words) or interview taking into account:
- their motivation for undertaking the programme
- relevant work experience
- prior qualifications
- references
